

# SO Y?

**Because gluten-free and lactose-free shouldn't mean taste-free.**

Okay, so you have to watch out for certain foods. But wouldn't it be nice to be able to walk into an ordinary supermarket and buy food that doesn't taste like it's had the flavour removed? Well here's something you will want to take note of: Vitasoy Soy Milky, Chocolate and Vanilla, and the Vitasoy Ricemilk range are all naturally free of gluten and lactose. And they're made in Australia from locally-grown non-GM soy beans or rice. Best of all, they taste great. So now, the only things you won't have to tolerate are the bland and boring.
